

Goldberg Variations

Lyrics by HP Tauschke

Aria

Yasha

That day
When I first glided over the threshold of your castle
Suddenly surrounded by the greatest thinkers
Their date of birth and death transformed into colors
Angel bread for hungry minds
It gave me wings on which I flew
Thereafter into heaven
Your stage the throne of nourishing spirits
Their echo in my enchanted ears
That day I knew I'm home
I looked for you in every corner
Surrounded by your magic world
Met your angels from another galaxy
That talked to me with words like music
Directed me into your dreams
Where I decided to be one of them

-

I played on your throne
Moving like a dreamer
When you silently entered your artificial universe
In which the clearest thoughts defined all matter
And created my love for you
I stopped playing
Listened to your steps
Your breath
Your whispers
Which reached my ears like holy secrets
Dived into the light of your laughing eyes
Searching what causes your wonders
These marvels that resonated to mine
Prodigies like metamorphoses
For you I became a butterfly

-

I flew around forgot myself
Intoxicated from my love
Your eyes on me
Me in your ears
I embraced you with each tone I've played
Two hearts should beat as one
Oh love you brightest thought
Defeater of time and origin of life
My existence was enlightened

In your universe the central star
My childhoods lightness emerged
Its innocence thoughts
Unknown possibilities
Bouncing fingers
Beats from my heart
My breath the song

-

Sparkling moments fading through time
Came to the space we shared in prediction
The happiest girl and her magician
In my mind you were mine
These little explosions in my brain
Tiny enlightenments like harbingers of unity
That corresponded with the beats of my heart
A trillion drops that became one river
Water music from ancient times
Enlightened the present
Tones like rhymes
You in my heart
My heartbeats in you
Won't open my eyes
The living dream
Forever true

Variation - I

Yasha

Seconds like hours
Hours like days
Days like years
My destiny companions

Thoughts like dreams
Dreams like reality
Reality like creations
I'll be your queen

Liberating from limits
An originator myself
Creating a universe
You'll be my king

Ruling time
Inventing space
Discovering the secrets
Feeling the might

-

Benjamin

Let me answer you
Cause it's a dialogue
A different thought
Changes the tone

I asked for you
Felt you exist
Hints everywhere
Glowing thoughts

Suddenly your tone
Hitting my heart
Familiar like blood
Beat of my dance

No doubt anymore
It must be you
What I called myself
Half of the whole

-

Yasha

Surprising you
Bewildering you
Ruling your mind
Directing your thoughts

Making you dance
Moving you like a god
Free like an eagle
Strong like a horse

Controller of the skies
Liberator of our souls
I'll make you the man
You don't know you are

I'll open you doors
Come to your dreams
We'll travel light
King and Queen

-

Benjamin

Asking myself
Do you know
How can't you
You opened the door

Traveling time
Touching your skin
Consummate love
Living dream

Seeing your birth
Sitting on moon
Watching the earth
Holding you tight

Glowing Olympus
Doorkeepers words
Eerie truth
Everything changed

Variation - II

Benjamin

You knew me
Chose me
For whatever reason
Searching for love

How big is she
Is it all
Are we Titans
Connected to Gods

What will I do
To show you my love
Will I die
Or learning to fly

Free like an eagle
Sharpest eye
Loving peaks
Reshaping time

-

Yasha

I knew
You never doubted
Up to Zeus
Down to Hades

Loving me
Only you can
Touching me
Without hands

Waves our senses
Stars our home
Kisses like drops
Sensations like rivers

Giving birth
Questioning death
Divine might
Loving desire

-

Benjamin

Melting flesh
Burning rain
Singing stones
Dancing iron

Virgin thoughts
Radical deeds
Circles like squares
Information is gravity

You think
I do
Wax in your hand
Blood in my veins

Awaken the past
Teasing the devils
Unmasking the Gods
Ruling life

-

Yasha

Being your fire
Burning your mind
Spending light
Splendid fight

Surprising mentation
Unheard words
Sharp diamonds
Painful sparks

Losing control
Gaining freedom
Marionette
Unleashed

Inquire
Discover
Deliver
Almighty love

Variation - III

Yasha

Love, almighty spring of life
Engine of my blazing blood
Sublimest sense and rife
Most promising tender bud

Blustery wind under my wings
Founder of inviolable verity
Resonance of sacred strings
Ultimate deed of clarity

-

Benjamin

Birth, almighty arising love
Infinite like empty space
Message of the heavenly dove
Love's tightest embrace

Invented by a Titans thought
Carried through eternal time
Coming out of naught
Love for sure is most sublime

-

Yasha

My love, will you recognize her
When she's flying over mountains
The fire which she will stir
Or the spring water fountains

Will you feel that she's coming from me
That girl you've only met once
Will she itch you like a flea
Embracing you like a sacred dunce

-

Benjamin

Your love, she burned my blood
She robbed me of the old senses
Came over me like the flood
Tore down all existing fences

Out of the fog I recognized you
What the Monkey already forgot
It came to me out of the blue
Sharp like a knife your love severed the knot

Variation - IV

Yasha

Golden times
Titans thought
Tones like rhymes
That's what I brought

Flaky hours
Divine touch
Comet showers
Tenderest clutch

Crane swarms
Cloud herds
Heart warmth
Chorus of birds

Unknown desires
Ember splash
Burning like fires
Titans clash

-

Benjamin

Touches like rays
Heavenly flood
Stormy blaze
That's what I got

Burning thoughts
Thrilling delights
Hidden shots
Lion fights

Mysterious girl
Brightest light
Shining pearl
Luminous night

Foreign acquaintance
Hidden tales
Blood cadence
Ancient rails

-

Yasha

That's what I love
You never complain
And always laugh
Celebrating pain

Bloodstreams like rivers
Fighting with Gods
Ember shivers
Clinching rods

Faster than light
Changing your skin
Day may be night
Virtuous spin

Dance to my song
Aviate like rain
Lightning prong
Enlightened brain

-

Benjamin

But did you know
Or just had a hint
Celestial show
Brought by the wind

Thousand questions
Answers immanent
Ancient suggestions
Years I've spent

Unbelievable tales
Hidden truths
Waging tails
Not to soothe

What's feasible
Really viable
Conceivable
Mathematically possible

Variation - V

Yasha

Marvelous wonders
Give me your hand
Don't be afraid
You'll see unknown land

Without limitations
We'll travel time
You'll find out
You were always mine

Let's fly like eagles
Love like we're one
Forget what you know
All will be gone

Take my hand
Touch it like waves
Tender like silk
We're no longer slaves

-

Benjamin

I take your hand
The tenderest one
I can't escape
The net you've spun

Astonishing horizons
Scenes like dreams
Perspectives unknown
Perceptions like beams

Forgot who I am
Feeling new born
Everything's gone
Nothing to mourn

Bridges all over
Borders blur
You're a Goddess
That's for sure

-

Yasha

Kiss me like clouds
Love me like water
Feelings like lava
Nothing is hotter

I'll be your lover
Dying of thirst
Burning desires
First things first

Give me your smile
Heartbeats like drums
Touch my skin
Enjoy my sums

Carry me to stars
Show me new sunsets
Fulfill the impossible
We won't have regrets

-

Benjamin

Sensations like rivers
Flavors like flowers
Emotions like sparks
Asteroids showers

Highest excitation
Quenching your thirst
Enjoying your smile
First things first

Divine vibrations
Shivering cave
Choral chants
Breathtaking wave

See the black hole
Glowing horizons
Your marvelous eyes
Shine like black diamonds

Variation VI

Benjamin

Hope
Most painful
Of all choices
Blinding
My eyes
You
Let me see
Bright illusions
Fata Morgana
Water in deserts
Lustrous eclipses
Saving islands
Light when it's dark
Desperate
Beating
My heart

-

Yasha

Hope
Most beautiful
Of all decisions
They say
You die last
You
Let me see
What might be
Giving strength
No valley too deep
Mountains I climb
Changing perspectives
Touching the stars
Faithful
Pulsing
My heart

-

Why
Do you deny
That you feel me
Touching your heart
Inspiring your soul
Ruling your mind
Kissing your skin
Seeing through your eye

Why
Tell me why
You won't understand
That's my way
Being close
Far away
Six sense
Loving you
-

Benjamin

I
Feel
You're in my eye
Under my skin
Beating my heart
Making me smile
Touching my soul
Reigning my mind

I
Know
It's feeling true
Must be you
Closest are you
Furthest away
Doubtlessly
Your love

Variation VII

Benjamin

Creating the space
Between the words
I love you
Shaping the silence
From tone to tone
Giving freedom
Forcing strength
Holding the breath
For worlds unknown
How weak the word
Majestic being mute
Why do I write
If there's no word
That can explain
The world of silence
The magic nothing

-

Yasha

I hear your silence
Feel your love
Sometimes frightened
About it's tone
Words like rivers
Rushing through time
Pushing me backwards
Punching my heart
Searching the truth
Stopping to breath
I eavesdrop the rays
Sent by your soul
Contradicting my thoughts
Tranquility like storms
So many trees
I can't see the forest

-

Benjamin

Abused by lyrics
Victim of deeds
I lost the space
Between my words
Torn by the spirits
Betrayed by visions
Seduced by wishes

I wanna be mute
Total resignation
Silence of the whole
Receiving sun rays
Feeling home
Part of nature
Slow like a snail
Sinking like honey
Into your eyes

-

Yasha

Don't be silent
I need your words
The space between them
I want to create
Stretching the time
Infinite impressions
Deepest perceptions
Endless sentiments
Tender mentations
Visions of love
Like mother nature
Birthing life
Tell me again
The magic three words
Two free spaces
Connected by love

Variation VIII

Yasha

Wonderful zones
Engaged by love
Tenderest tones
Wings of the dove

Delightful orbit
Awaiting genesis
Let's absorb it
Metamorphosis

Wondrous shift
Just yet abyss
Enchanted gift
Soul of the kiss

Alien world
Our homeland
Visions curled
Hand in hand

-

Benjamin

Celestial companion
Mother of romance
Cosmic anion
Launching dance

Twirling and whirling
Almighty source
Wizards chanting
Controlled force

We spin a net
Catching the Gods
Claiming their debt
Our odds

New beginning
Stronger than ever
Our inning
Gigantic endeavor

-

Yasha

Is it real
True what I feel
Are we a new race
Controlling the space

Childs of unification
Heavenly sensation
Dominating dimensions
Adding extensions

Liberated Titans
Wondering enlightens
All informations
Received donations

Love its motor
Wind its rotor
Water its legacy
Almighty destiny

-

Benjamin

It's our choice
Hear its voice
Life's salvage
Our advantage

You and me
We can be
Defeater of Gods
Taking their rods

These are the times
Revealing their crimes
Burning Olympus
Beating the pimp

Ending the Genocide
In heaven they hide
Breaking their rafter
With loves laughter

Variation IX

Benjamin

Often when I speak to you
Closest when you far away
Your eyes on me like shooting stars
Telling me some truth of us
Offering me to execute my wishes
Being the man you see in your dreams
Loving you and save the world
I wonder about the might you have

-

Yasha

I am love the pleasant wonder
Ignited by a Titans thought
I'm speaking to your thirsty heart
Vibrating your delightful mind
I'm fashioning the man I need
To free the world from mighty Gods
Taking back the paradise
Living on a globe of treasures

-

Holding you in tender arms
Warming you with silklike skin
Impacting you with shaking tones
Whispers of the holly strings
I build you out of secret water
Kissing you like flying drops
I irrigate your loving laughter
Thereby it shakes the universe

-

Benjamin

Love you stimulate a massive move
You shake my heart therefore the miracles
Open the curtains to a hidden world
Where you and me were always one
I thirst for you with every gene
Every thought related to you
Each deed a stone for our castle
Your breath nutrition for my hungry mind

Variation X

Benjamin

Who's that second soul in us
That forces deeds without discuss
That's connected to the Gods
That makes us feel like empty pods

Who is it that claims that we are one
That there's the laughing day we won
Dancing and singing through eternal time
Working together like a rhyme

Please tell me I'm sure you need to know
Who's the ruler behind the show
It's impossible that you are blind
Is there a contract that you've signed

And if so what will happen to me
Without you how can I be
Something in me belongs to you
This stormy sound I can't subdue

-

Yasha

I need to speak in silent enigmas
We are trapped in ancient stigmas
Divided by the hands of others
You can call them our brothers

For them it's just a game with life
For us it became an endless strife
When I found you I wasn't sure
If this can be the final cure

Sometimes I thought you understood
That you've remembered our childhood
But then you've started a useless fight
That darkened everything that was just bright

In such dark night there's nothing to do
And I feared it becomes our Waterloo
Remember the night when we first met
Open your eyes and follow the thread

-

Benjamin

Your enigma doesn't make sense
It's stimulating my defense
If you know why do you hide
Rather than being a truthful guide

Oh yes I remember that night we met
I saw clearly the horrible threat
I've heard it loud what the doorkeeper said
His words implanted like thorns in my head

I went through that night a thousand times
I stepped on each of the hidden mines
Wounded like a fox after the hunt
Happy that I survived that stunt

I'm sorry but you cannot know
Even if you're ruling the show
Your words are born in my searching mind
Controlled by Gods I'll never find

-

Yasha

Wasn't it you that claimed that night
That it's love and not the fight
That will free us from foreign might
That will lead us out of the nights

Yes my words are born in your thought
But love the only thing I taught
It's up to you to hear my voice
You're the one that makes the choice

I deliver information
Hoping that you'll find causation
I let you come under my skin
Am waiting for the final spin

That you move me close to you
That you love me like I do
Thereby the tales becoming true
Thus the moonlight shining new

Variation XI

Yasha

Why do you doubt
Claiming you know
What shall I do
Kisses like snow

You've got it all
Wonders like stars
But you prefer
Fighting with Mars

You've got my love
Tender like snow
Is there the time
You'll knead the dough

What shall I do
That you will trust
Raising a storm
Dancing stardust

-

Benjamin

What shall I doubt
It's all so clear
Losing my blood
You've made me fear

Don't get me wrong
I won't complain
I chose my way
Knowing there's pain

There is no sign
That you ever knew
You might proclaim
I missed the clue

What is it about
Your hidden life
In front of me
Handling a knife

-

Your words to me
Stunk like a lie
Open your ears
And hear me cry

What you call love
Is just desire
My heart still burns
You've set the fire

I hear your words
Born in my mind
Loving snowflakes
Feeling inclined

I have no doubts
You've built the doors
To tell the truth
Isn't fighting wars

-

Yasha

You don't fight me
You fight the Gods
Just like Cronus
That ate the rocks

Please hear my words
You missed a point
Your love will be
The missing joint

Forget mistakes
Oh love please trust
My loving word
Your angel dust

Forget the deeds
It was not me
You know it better
Please set us free

Variation XII

Benjamin

When I'm under your skin
Searching truth in your head
Feeling like I'm your twin
Embracing you in bed

Everything seems so clear
Seeing your pics and deeds
Being part of your sphere
Wond'ring about these seeds

I ask what you expect
Where you think it will lead
How the fuck to protect
How to cool down the heat

You say it's your singing
If I would just listen
Undergo your thinking
Feeling your decision

-

Yasha

I gave you many clues
But it seems that you're blind
I want to be your muse
Ruling your precious mind

I want to heat your blood
Until your heart explodes
Staying in deepest mud
Until your skin corrodes

I want to see your bones
And want to feel your pain
You shall listen to stones
Secret tones of the rain

I want you to love me
Like nobody before
That you will find the key
To open my heart's door

-

Benjamin

You're talking about love
As if it is a war
Willing to smash the dove
With the hammer of Thor

Baby I've seen all signs
No question that I know
I stepped on all your mines
That where part of your show

But what you never got
The reason behind all
That it is another plot
Can't you hear life's still call

You want to reduce it
To a genius drama
You and me just transmit
Your own personal trauma

-

Yasha

I know you think there's more
You found a hidden truth
An unknown magic ore
A missing wisdom tooth

Well I can't believe it
I cannot understand
I think you have to quit
And take my tender hand

Let us perform my play
Let us fly to the sky
Let us love and allay
The things that need no why

You will never lose me
If you follow my way
Walking over the sea
Traveling as a ray

Variation XIII

Benjamin

Baby if I wouldn't know
About the hidden link
There would not be your show
The ship you drive would sink

I would not let you lie
Laughing into my eyes
I would not be the guy
Deliv'ring butterflies

If I would think that you
Really know what you do
That you're not a hostage
Living on my wastage

You wouldn't have my stories
That hold you in Olympus
You would tell allegories
From a stupid pimp

-

This is not a dialogue
It's only me that speaks
I blow away the fog
I guess you'll get red cheeks

We both know you're guilty
You hacked into my life
Your deeds were all silty
My friend isn't alive

Your career based on fraud
Three times you poisoned
People that had you taught
Strongest wins you reasoned

I guess you're still not clear
Why you received my love
You're still driven by fear
Rather killing the dove

-

And every time we meet
You're lying like a child
You still not see the seed
That is growing up wild

Perhaps you just delete
The memory in mind
You never feel the heat
Your eyes already blind

My memory still serves
I know my friend is dead
An other lost his nerves
The reason was your threat

You were hacking my home
Your friends poisoned my food
Around my mouth was foam
And you're watching me nude

-

So tell me what to do
With such criminal deeds
Tell me a proper clue
What are your truly needs

People are not just toys
They have hearts just like you
You're making too much noise
And getting rid like spew

Well now I'm so tired
Should I say you're fired
Kicking your butt away
Give you the bill to pay

Forget what I believe
Why can I not just leave
Guess there's civility
Responsibility

Variation XIV

Benjamin

Macha never wondered
That you were just around
And joyfully plundered
Her magically pure sound

How big are the chances
For such coincidence
Lucky circumstances
You're playing innocence

Suffering, anguish, sickened
Anxious, worried, concerned
Wounded, tainted, injured
Shaken, mangled, bruised

A chance one in trillions
You got it more than twice
Let me take the millions
Thereby a star will rise

-

Karl the famous wizard
Already in your hand
Acted like a blizzard
Took over Macha's land

Yasha untouchable
By acting like a child
But not invisible
Your ego is too wild

Blackmail, stealing, lying
Hiding, smuggling, killing
Shameless, ruthless, darkness
Vainly, brutal, heartless

I bring it to the end
There is no other way
So many years I've spent
You had no truth to say

-

Is there anybody
That you haven't hacked
Where you weren't bawdy
And acted with respect

You think that for the arts
Is everything allowed
Your actions stink like farts
But you're constantly proud

No art, wisdom, vision,
No dream, foresight, mission
No love, ideals, beliefs
No plan, no sense, just griefs

You have nothing to say
There's no fortunate way
There's only scorched earth
Nowhere a seed of birth

-

Master of copy paste
No own truthful feeling
Your own thought sounds like waste
Just horrible squealing

Listen to your laughter
There it's clearly to hear
Like a blinded drafter
A bawling puppeteer

No truth, no depth, just lies
Cheapest shit of the flies
Poisoned, darkened, your mind
Betrayed by you mankind

There's now a bill to pay
Birds sing it from the roof
You'll curse for sure the day
Your deeds you can't disprove

Variation XV

Yasha

All my criminal energy
Hidden behind my baby face
For nobody detectable
A perfect sunny hiding place

You know everyone has dark spots
I just bring the luminous light
Then I fire some warning shots
Therefore they'll know they lose each fight

I have them all in tender hand
The dark secret of my success
Everybody stays on quicksand
And I'm just playing with them chess

Unfortunately you're different
And I missed the chance to kill you
All the valuable time you've spent
To make me kneeling on the pew

-

Benjamin

Yasha you showed way to often
Your dark dangerous witch grimace
Coming out of the black coffin
Unfortunately without grace

You know I'm absolutely convinced
That your not master of your brain
There's someone else that had you minced
Which is leading you on a chain

But since you'll never stop your crimes
Sending virus pictures around
Conquer computers all the times
Blackmail people with what you found

You forced me to take action now
Putting the cards on the table
The dirty ground I have to plow
And taking away your sable

-

Yasha

Now I wished that I had listened
I wished you could turn back the time
When the stars for me still glistened
When they still sounded like a clime

It's becoming dark and silent
The moon is full and will go down
All is becoming violent
I'm feeling like I have to drown

Oh Benjamin what have I done
Tell why I could not get enough
Why couldn't I see that you're the sun
Why couldn't I see that you don't bluff

Oh please tell me what can I do
You always had the right answers
You have the most wonderful view
You're the noblest of all dancers

-

Benjamin

As I have told you years ago
When you started your war on me
The time will come, end of the show
And I'm holding your freedom plea

None of us is really guilty
We are all still ruled by the Gods
War, the source of their energy
We have to understand the odds

Information isn't knowledge
Ideas are not from this planet
So we all have to acknowledge
We found no answers for Hamlet

We're running in perfect circles
Always looking for a way out
The colors we see are purples
Even life's motor, love we doubt

Variation XVI

Yasha

Fight, lie to hide the other lies
Attack, in the dark of his night
Come closest now, like children
Surprise, amaze, like shooting stars

Spectacular, unexpected
Sudden laughters, mysterious
Flying birds swarm, enraged cow herds
Astonish like a newborn child

Dramatic views, stunning movements
Shocked sensations, dismayed feelings
Twisted my thoughts, consternation
Predictable coincidence

Startled abrupt remembering
Perhaps better raising grieving
Memories, imaginations
Hidden in darkest blurry nights

-

Benjamin

Debris, under water, floating
Sitting above, laughing, wondering
Seeking for thoughts, failing, laughing
Astounded, no, flabbergasted

Think, now, something, worth it, or not
Just think, perhaps about flowers
Probably dreams, light beams, rain showers
Imagine life, suppose there's love

Retrieve your life, conceive a dove
Intend new birth, a little seed
Presume you're right, remember light
Consider the fight, darkest night

Call back your love, cogitate light
Wonder, see, breath, sense, feel the air
Want, intend, remind, tell yourself
Nevertheless she's now the best

-

Let her go wherever she wants
Let her take your heart to survive
Send her your breath, make her alive
It's in your thought you shouldn't doubt

There's something above great as love
Wonders like snowflakes in summer
Miracles like your love for her
Surprises like her play with you

Curiosities like her lies
Rhapsodies from another world
Ironies for biggest laughs
Mysteries like traveling time

Questions you never asked before
Splendors nobody ever saw
Delightful like a perfect muse
Dangerous like a hurricane

-

Yasha

He'll eat the bait like every time
He'll finish his variations
And I play them like they were mine
Cause that's what it was all about

Standing in the splendid light beams
Celebrating views from above
Festivities on Olympus
Conducting extravaganza

Praising holy informations
Rewarding deeds, featuring me
Emphasizing glad behavior
Celebrations on red carpets

My world, all yours, nobody cares
The music of the Titans world
Hammerklavier like never heard
It's all yours but I'll keep it mine

Variation XVII

Yasha

Where are we now
Is it life
Or is it art
Holly spirit
Devil's fart
When I need him
He shits on me
Cut the strings
Lose my might
To win the fight
Will I remember
All my lies
Or change the side
Tell the truth
Or empty the bottle
Just pass away

-

Benjamin

It's not so easy
Like you thought
Thoughts are Titans
Elements the Gods
They wanna live
No matter how
The Chinese say
What's destroyed
By humans
Can be repaired
Only by them
We can forgive
And we support
If there's truth
Cause there's love
The motor of life

-

Yasha

Leave me alone
With your truth
Just spare me
Your human mind
I was never rewired
In a design sense
So the IQ level

Didn't stoop
I'm gonna amp it up
Jam time now
New handling
Of the affairs
A mirage
Of an expectation
Clear thinking
Supreme supremacy

-

Benjamin

Try to hear yourself
You never listened
How ridiculous
For a musician
I caught you
Like a rat
Supreme supremacy
Where is it now
My nose is more clever
Than your supreme IQ
Wake up
Take the chance
The people
You've hurt
The once
That will help

Variation XVIII

Yasha

Dark death silence
Worlds unbalanced
Tender outwit
Never admit

Dark evil deeds
Mephisto's seeds
Mistrusting eyes
Everywhere spies

Conceal the witch
Withstand the itch
Antitoxin
Stop the tocsin

Enlightened thoughts
Opening knots
Brightest heaven
Magic seven

-

Benjamin

Truth unfolded
Doubt's implanted
Slowest venom
Deathly benumbed

Frogs are singing
Creation's spinning
Love's waves floating
Timeless trav'ling

Life's orchestra
Hyperbola
Laughing quaking
Lies destroying

Gods are nothing
Titans thinking
Steel is singing
Silence's screaming

-

Yasha

Creating thought
Love what you taught
How could I lose
Why did I choose

It can't be me
At night I see
Glorious light
Imperial fight

I always won
Spiderweb spun
Mountain rivers
Music givers

Fine melodies
Like elegies
Wise rhapsodies
My felonies

-

Benjamin

Your silky web
A wondrous ebb
But you forgot
The higher spot

From there above
Love's what behave
Cristal clear view
She's gonna sue

Monstrous killing
Truth fulfilling
Question of times
Hidden in rhymes

The laughter's voice
Love's supreme choice
Will help you out
Life's holly sprout

Variation XIX

Yasha

Oh laughter
Children's voice
Oleaster
Immortal choice

First showdown
Mother's birth
Blazing crown
Living earth

Extant breath
Breathing space
Dance of death
Rotting race

Leave me now
Devil's brood
Cocked bow
Fleeing pseud

-

Benjamin

Evil's lost
Fruition
Pentecost
Abscission

Life's flavor
Is adverse
Lost quaver
Betrayed terce

Sneaky God
Discovered
Rotting clod
Discolored

Water's singing
Life's whirling
Announcing
God's fleeing

-

Yasha

History
Liberty
Mystery
We were free

Oh freedom
Now you're back
Oh kingdom
Loving shack

Devious word
Devil's sword
Firebird
Flaps are heard

Earth's thunder
Shakes Olympus
Go under
Paltry pimp

-

Benjamin

Prisoned souls
Now you're free
Life controls
What will be

There's no place
On our earth
Hidden race
Absurd dearth

We've no need
Deathly seed
Goddess breed
Darkest bead

Benjamin
Say goodbye
Yasha's sin
Gods black tie

Variation XX

Benjamin

In cloud waves we will swim
Moved by the magic hymn
Billions of laughing hearts
Enchanted by the arts

The Gods above will yield
Olympus a debris field
And as life had foreseen
Flames will dance in between

Night on earth looks like day
Defeated Gods will pray
Zeus whining like a whelp
Begging Titans to help

But no, his ancestors
Won't defend molesters
Prisoned and way to long
Bidden the final gong

-

Yasha

If you can think the world
Behavior will be gnarled
You will act like the sun
Causes light Hades son

You felt all destruction
Seeing all abduction
The unbelievable
The irretrievable

In the unknown you've shown
A billion voices moan
Born and raced in bright hell
Most deplorable smell

Can you think end of time
A wondrous paradigm
Cause that's what you've to do
For schubidubidu

-

Benjamin

Love's laughter will thunder
There will be no plunder
Cause that's life's great power
Always blooming flower

I can't forget her smell
Ubiquitous in hell
Hidden in everything
Must be the only king

Who am I not to love
Listening to the dove
Growing by supporting
Laughing while reporting

Strong wind will sing with birds
Freedom the string of words
Gods burning in their hell
Mute screaming their farewell

-

Yasha

Secrets told by the wind
The face of God is skinned
But it's not over yet
Zeus won't give up I bet

He'll be in everyone
A spiderweb he spun
In every thought you'll think
There'll be a missing link

You have to trust your heart
And rip your brain apart
You'll need the coldest blood
The all destroying flood

The wondrous laughing child
That never was beguiled
Spread your wings like eagles
Shoot the sharpest needles

Variation XXI

Yasha

Do you in dark nights remember
Years ago the hot September
When our blood felt like ember
And burned until cold December

When you came to me each cold night
Our love the most glorious might
Blue stars at daytime shining bright
You told me that you'll win the fight

-

Benjamin

These words are burned in every cell
I made sure that Zeus could it smell
That I'll arise from glowing hell
To send this bastard to farewell

Trust me my blood is still on fire
In Olympus they'll learn to perspire
Searching for a rescuing wire
Running up the highest spire

-

Yasha

How you touched me without your hands
Abducted me to holy lands
To other galaxies bright strands
How we loved us in whitest sands

Tell me that it wasn't a dream
That we were traveling on light beam
That you have heard my lustrous scream
That you've tasted my sacred cream

-

Benjamin

Balancing on my fingertips
Swinging with your most gorgeous hips
Sending kisses from your hot lips
I remember it like an eclipse

You surrounded me like water
Overtook me like a squatter
Surely you're a Titans daughter
In Olympus they fear their slaughter

Variation XXII

Yasha

Deciphering
Destroying tree
False branch pruning
Ravaging scree

Can you forgive
By changing time
Fell through the sieve
I lost my chime

Scent of flowers
A baby's scream
Senses powers
Bended light beam

Three hundred nights
I feared nothing
But the limits
Of our love

-

Benjamin

There's no limit
I can admit
Love's just silent
Like a diamond

She hides from you
Up in the tree
Fled like a bird
Your thoughts she heard

What to forgive
Since you don't know
What you have done
Nor who you are

What I have done
I had to do
Shooting the gun
Out of the blue

-

Yasha

Blood all over
A thousand wounds
People snuffer
Horrible sounds

Give me a sign
Beside your rhyme
Open a door
Let's end the war

Let me tell you
From eye to eye
Everything's skewed
I'll whisper why

A nightingale
Last summer sung
Exiting tale
With golden tongue

-

Benjamin

Doors are open
Your unknown rooms
Just Titans dare
Exploring blooms

Contemplating
Leveraging
Envisaging
Wonders seeking

Touch the unknown
Love's art I've shown
Arrogant nose
Devil's fart chose

Watch the mirror
Discern the lost
Sentry your truth
In eyes embossed

Variation XXIII

Yasha

Can't you see I'm wounded
Can't you feel foreign pain
On my knees I'm begging
I'm probably insane

Just take me in your arms
Tell me your tale of love
Flying over mountains
I'm gonna be the dove

For you I'll be myself
The woman you explored
Cut of the other one
Your word the sharpest sword

Sensitize the disguised
Cause the flower to blush
Enchant my unlit soul
Let me be your song thrush

-

Benjamin

Can you hear my laughter
Than let's laugh together
Therefore your unlit soul
May loosing its control

That's what you really need
The power of light speed
Trust in holly nature
The simplest behavior

Silent flowing water
Conducting gravity
Storm let trees just totter
Mythical levity

Control is letting go
Art is always as so
Glorious Titan whiff
There's no art in as if

-

Stop lying to yourself
You'll miss the miracle
You'll never see the elf
Damned to the visible

Enchanted modest heart
Scent of blooming flowers
Fresh water a la carte
Meteorite showers

Secrets are in the small
Your thoughts infinitely sprawl
Love is nature's language
Devils fart just slanguage

Vanity makes you deaf
Those ears can't see the clef
Those hands can't tell a truth
Those movements aren't sleuth

-

Yasha

It echoes in my ears
Embarrassing my fears
Eyes with saltiest tears
Guess children are my peers

My lungs won't breathe no more
My heart the giddiest
My blood won't float no more
My brain the muddiest

Not a Titans daughter
Cause I fear the slaughter
Who am I if you're right
Feels like an awful plight

Is there light after dark
A holly spirit spark
Can you hear me bawling
Hold me cause I'm falling

Variation XXIV

Benjamin

Every bird flies different, some may fall
What you think your drama tells me now
We all know that the truth is simple
First look up if you search for mushrooms

What's the reason that you came back
Fear of unfinished variations
Well they're gonna tell you what you'll miss
You're the first, falling through empty space

No consequences if you spread the wings
You'll just fall until the end of time
You'll never hit any virtuous ground
By telling yourself lie after lie

No you can't stand these variations
You'll ruin them with your hellish lies
Creating sound mud with your pedals
Using fingertips instead of -prints

-

Yasha

We both know that this doesn't matter
They'll still be the most fascinating
Thanks to you my brilliant darling
Nobody saw it's a dialogue

It's my own story I have to tell
You'll wonder how crystal clear each tone
Only me and you will really know
Everybody else believes in lies

Just finish our variations
I play them like nobody before
Nobody else ever flew so high
From above I'll look down on Olympus

Where the others are that stole from you
But it won't be a theft cause it's mine
It's my adventure I went with you
But there will be no applause for you

-

Benjamin

As if I care about cheap applause
Only highest mind is good enough
Well the air is very thin up there
Don't forget to take the deepest breath

This is the story of your failure
I truly doubt that you can stand it
Your slummy story of betrayal and creed
Of blackmail, infamy and vanity

If this one reaches your unknown heart
Over your keyboard you'll break apart
The most solitary girl on earth
You would have to bear the darkest night

Baby girl you'll never reach this point
Cowardly you'll just betray yourself
And never smell the scent of flowers
And if you try you won't understand
-

Yasha

I guess I came back to hear just that
That you can finally knock me out
You've no idea how much I want that
Looking in the mirror to be new

Seeing the woman that you explored
I just fear that it might be too late
That this woman is already dead
That I missed the point of no return

You've told me maybe a thousand times
A musician that doesn't listen
And when I do there's only silence
Silence in my mind and emptiness

What will be the divine deed to do
In which secret language shall I speak
That everybody I betrayed forgives
Can you please tell me the magic spell

Variation XXV

Benjamin

Silent tone
Wizards zone
Water brought
Splendid thought

Light follows
Every deed
Second soul
Foreign seed

Burning tree
Knowledges fee
Snake the wave
Human's grave

Breaking branch
Hear the sound
Life's voices
You have found

-

Yasha

Garbled brain
Arctic rain
Drops like ice
That's your spice

Savage death
Debunking
Vitrified
Feuds stunting

Hitherto
Awful quest
Afterwards
Strife undressed

Naked zilch
Hellish white
Dimensions
Are in fight

-

Benjamin

Veiled data
Tsunamis
Unconscious
False amice

Seventh sense
Omitted
Interface
Fine pitted

Splendid ideas
Conceited
Ancient lore
Maltreated

Stashed knowledge
Water serves
Reconnect
Living nerves
-

Yasha

Hellfire mind
Downloaded
Tree of life
Eroded

Who am I
Who are we
Are there two
Are we three

Split soulmates
One in me
One in you
Set them free

Displaced
Mistletoe
Let us dance
Fandango

Variation XXVI

Benjamin

Did you ever walk in stormy rain
Endless drops hitting your icy face
Each one a soul wanderers saga
Queer chronicles of an unknown race

Foreign at first but so familiar
Like that one kiss you never became
The one imagined but never felt
White canvas in a marvelous frame

Like a tone that doesn't reach your brain
Child-like laughters from the oldest men
Wild roses fragrance but from a tree
A snow peak mountain in deepest glen

Those skin that can understand these drops
Has ears which hear echos from the past
The laughters before the word took place
The time when our senses were still vast

-

Yasha

What is it then what we're calling death
Illusions caused by bad connections
But if death is true who's dying then
Who's coming back by resurrections

Aren't these just mythical stories
Or is the line in truth a sharp knife
Just to see by changing perspectives
But can't believe 'cause it isn't rife

And if the will is not really free
Who fired then on you the gun
If not Gansa who attacked you then
Who lies steals betrayals murders for fun

Who's responsible for the peril
Somewhere else the evil is rehoused
How to think that we're not guilty if
Mephisto a creation of Faust

-

Benjamin

Without the word of God there's no lie
Without death there's no need for a God
Life's created on transformation
The concept of death is very odd

Action is based on information
Wrong information leads to false deeds
But the information can't get lost
In mythical scripts you'll find the seeds

Just change your perspective and you'll see
The truth is carefully wrapped in tales
Mephisto a creation of Faust
But destruction is ruled by set trails

You can't say that you know what you do
Manipulated by foreign might
Can't even believe this simple truth
Since your brain is ruled in moonshine night

-

Yasha

The sun see's your body the moon your soul
That's what they say and it might be true
Forgive them they don't know what they do
That's what he once said we have no clue

How to smell the flowers fragrance then
How to communicate with the trees
How to get answers from pure water
How to fathom the whispering breeze

How to love when ruled by destruction
How to realize when you're not free
How to answer never asked questions
How to find the lock if you're the key

You've once said just listen to your heart
That this heart can think just like the brain
When I'm able to see with my heart
I'll find answers in each drop of rain

Variation XXVII

Benjamin

Water is your body
Deluge liquid your brain
Informations shoddy
Disconnected from rain

Conscious elements
Born in wildest fire
Dimensions battlements
Never seen so dire

Thoughts built on symmetry
Break it to get magic
Suddenly trinity
Mystic and fantastic

Error correcting code
Base of evolution
Hear the tone of this note
Water's the solution

-

Yasha

Know it's distillation
Closest to lunation
New thought inhalation
There's the destination

Will we dare to go there
And dive into that sphere
Drink the clearest water
Love the Titans daughter

Founding a universe
In void space we'll immerse
Conducting the essence
Nothing else than presence

Just that very moment
A new born component
A possibility
Of viability

-

Benjamin

Filling the empty space
New flowers in the vase
Igniting unseen lights
Embracing future sights

Up and down we can spin
At ease exchange our skin
Feel what the other feels
And further sky reveals

While distance disappears
Enjoyment will cause tears
Salty as sweetest life
Dancing on sharpest knife

The sounds between two words
Sung by majestic birds
Will fill our Milky Way
And oldest rules will sway

-

Yasha

When I listen to you
Everything sounds easy
As if you really knew
Magic words from genie

Feels like you are able
To come under my skin
Like a tender sable
Like laughters from within

I wish I had the guts
And open up my wings
It really drives me nuts
I cannot cut my strings

I know fear's a liar
But are my feelings true
Dancing on that wire
Just back and forth to you

Variation XXVIII

Benjamin

I know because of you
Wondered if you know too
Saw the mountains moving
The Titan's thoughts proving

A tinge from thousand miles
The privy of life's isles
Water at its forth phase
Energy's hunting blaze

During an explosion
A vast silent omen
Colored darkness shining
Love's unknown gems mining

Suddenly united
Foreign worlds ignited
Flaky sound waves trav'ling
Thoughts on strings balancing

-

Yasha

Be truthful to yourself
Your knowledge comes from shelf
When I came to the pier
You only felt your fear

Lead by your instincts
Love just shady imprints
Your imagination
Shrunk you to oblation

You might be right or wrong
We'll never hear the song
Whilst you're dead and alive
No drama to derive

No end nor a begin
An endless circle's spin
A thousand kisses missed
Or luckily the grist

-

Benjamin

It may look like circles
Closer look shows spirals
Deeds show what to expect
Nature laws can't be wrecked

We both know what's been done
We'll see who holds the gun
Just try to smell the air
Scent of rising affair

No doubt the bird will sing
Fate of vibrating string
And yes we'll hear the song
The monkey named King Kong

Deep in my dark jungle
I grew magic fungal
And creed will not withstand
These diamonds freehand

-

Yasha

Raging anger untamed
Supercilious inflamed
Ridiculous King Kong
Weak when you should be strong

Instead of living love
Hunting the holy dove
Blinded by sneaky Gods
Destroying all your odds

Embrace your enemies
My thoughts your remedies
You know there'll be the day
End of the shadow play

We don't know what we do
Your claimed angle of view
You convinced me it's true
And real love did accrue

Variation XXIX

Yasha

Thoughtful tones
Loving heart
Vibes of stones
Total art

Tactile skin
From inside
Light within
Gliding ride

Created
Sensations
Elated
Foundations

Water's scent
Discerned glyph
Immanent
Flower's whiff

-

Benjamin

Celestial comedy
Our lived reality
Now your wind blows through me
Storming from oversea

Adventure perfused
With unshakable joy
The war and doubts disused
A sparkling brain the decoy

Lights only found in love
A million bites thereof
Fresh blood tastes like lava
Long Wang starts new saga

Elements are controlled
Reunion of split souls
Resistance is futile
Infos found in black holes

-

Brain is the receiver
A controlled believer
He's also the sender
The perfect surrender

As long as you don't know
It's a mystical show
Desperate searching truth
Hope in trusting your sleuth

Nobody can betray
Identified bouquet
Cause it's built on matter
No room to play Satyr

Most senses can be fooled
Life by foreigners ruled
Believing in free will
Evolution's standing still

-

Yasha
Eden's scent
Remember
Immanent
Pretender

Flower's whiff
Well-known sniff
Serpent's wave
Plato's cave

Another one
Is outside
Life was gone
Hellish ride

Hope you're right
Unknown might
Won't contrite
Win the fight

Variation XXX

Benjamin

Let's be Janus
End the heinous
Virtuous spin
For new begin

Glorious end
Decay transcend
Fresh commencement
Sweet enhancement

-

Yasha

Transformation
An equation
Unite water
Titans daughter

Form my body
Compress the air
Let's ride into
The holly sphere

-

Benjamin

Love our asset
Stronger than fear
Like on sunset
Nights disappear

We have to choose
And always can
Let's light the fuse
Newfound lifespan

-

Yasha

There's no good tune
In devils world
Seductive fume
Brain waves get curled

Your love so clear
Tunes never heard
I'll ride your spear
My heart you've stirred

Aria da Capo e Fine

Benjamin

On the laggiest path we went
Ones we saw a glorious end
Didn't feel like a simple dream
But balancing on sharpest beam

Breath defining the speed of time
Each one part of a paradigm
Shifting thoughts between dimensions
Each one building new connections

Perceiving details of the whole
The evolution of your lips
Your magic eyes that looked through mine
That moment of total eclipse

Awakened by delightful tunes
Your fingers danced on pulsing skin
Played melodies from future times
Like whispers of an unknown twin

-

Yasha

When those times are on horizon
When kisses feel like trees can sound
We're loving us like eagles fly
There talon in our bloody wound

Will I forgive when you were wrong
Can you forgive when you were right
Which miracle tears down the doubts
That everything was true first night

We're beginning we do not end
We'll see just like the water flows
Let's maneuver like water's waves
And make sure you defend your rose

The most fragile you've ever touched
Your flesh penetrated by thorns
In the name of love still standing
Like a mountain in thunderstorms

-

When you come I am always there
Wond'ring if you know where it is
Dancing like flames in burning heads
Sometimes laughing and full of bliss

How much you love to laugh with me
Let's make sure that this never ends
No matter how foreign the world
On the Titans thought it depends

Can you think beginning of time
Emergence of a universe
Where we start all over again
In oceans I want to immerse

Won't miss the never given kiss
You'll wish it's not the only fun
My word born in your flaming heart
Creation of the brightest sun

Benjamin

The clearest thoughts burn in silence
Seconds later they disappear
As written words they keep alive
Breathing in their own atmosphere

This universe lives forever
Its information can't get lost
You only know what's right or wrong
While I got hunted our paths crossed

Did coincidence save my life
The queen between me and the hounds
Thousand secrets revealed one truth
There's only love to heal those wounds

Variations like shades of us
The only thing I have to give
But if you play them in the sun
You'll ensure they'll always live
